# Retail's Impact

1 in 4 jobs  
are retail

RETAIL PROGRESSION creates COMMUNITY GROWTH

# Why Should a Municipality Invest Resources in Retail?

Retail builds on retail. Retail economic impact adds up quickly. Retail attracts the workforce that attracts the primary jobs. Retail influences executives looking to locate their company in your community. Retail enhances the quality of life. Quality of life encourages the future growth of your community.

retail recruitment ladder

Retail builds tax base --- Retail adds jobs from entry-level to managerial --- Retail builds communities

MOVING PARTS

# Retail is Complicated...

## Challenges:

Constantly moving target

COVID-19 Disruption

Data overload

Millennial preferences

Right sizing retailers

Site Selection

E-Commerce/Omni-channel

Data vs. Real Estate

Takes 18-36 months to close a deal

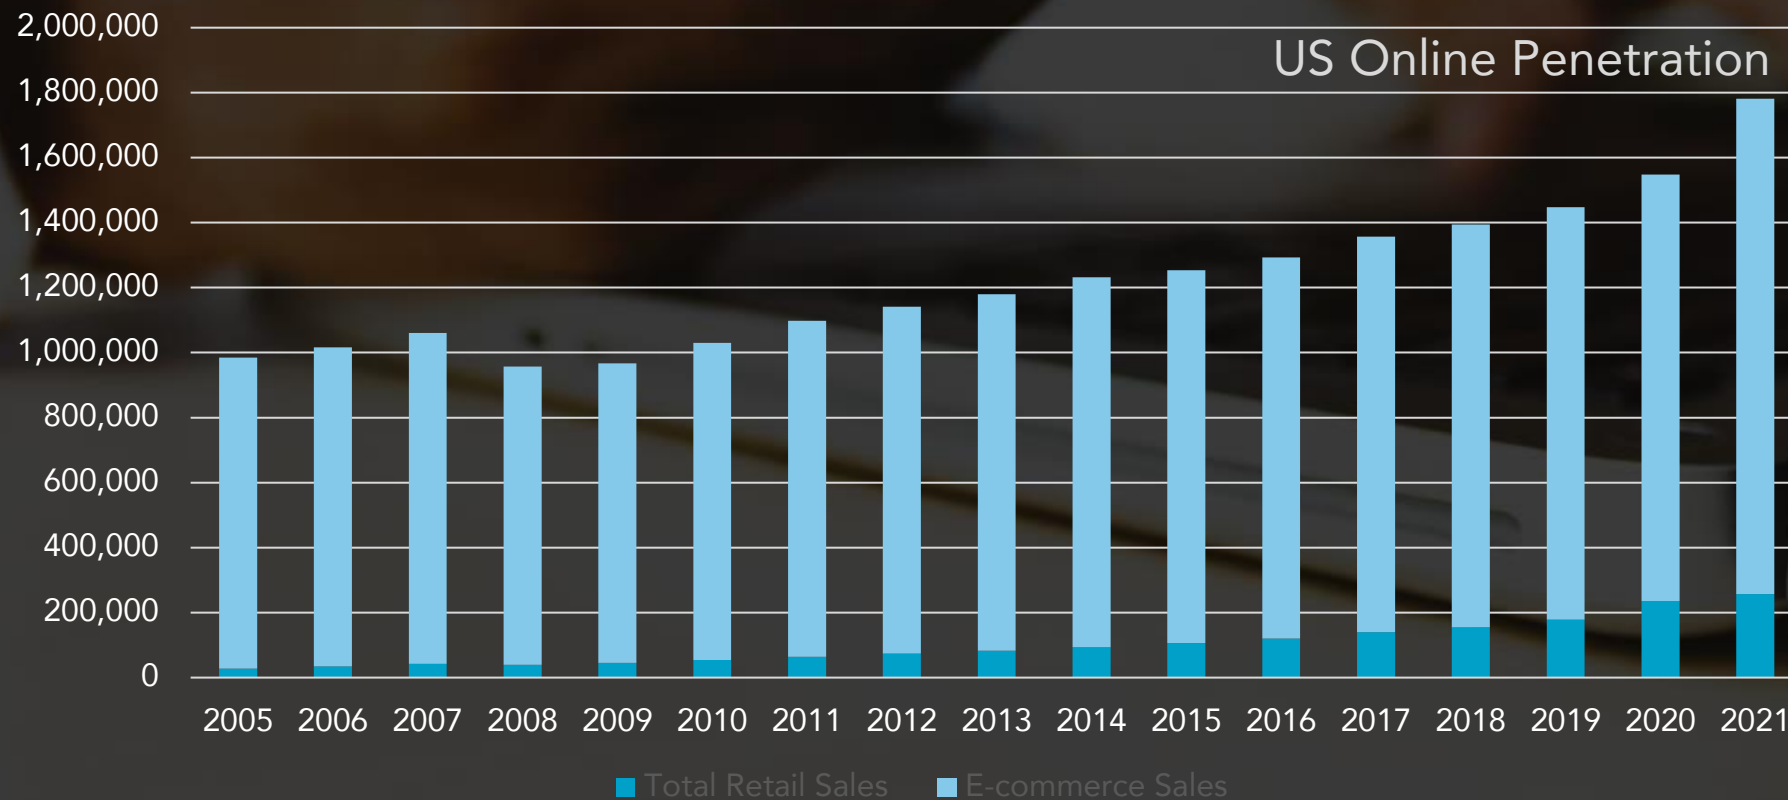

## TRENDS

# E-Commerce

Online sales have increased dramatically with the advent of new technology. However, e-commerce is still a relatively small portion of all retail sales, capturing 14.5% of sales in 2021. More importantly, we need to recognize the trend and be aware of retailer reactions.

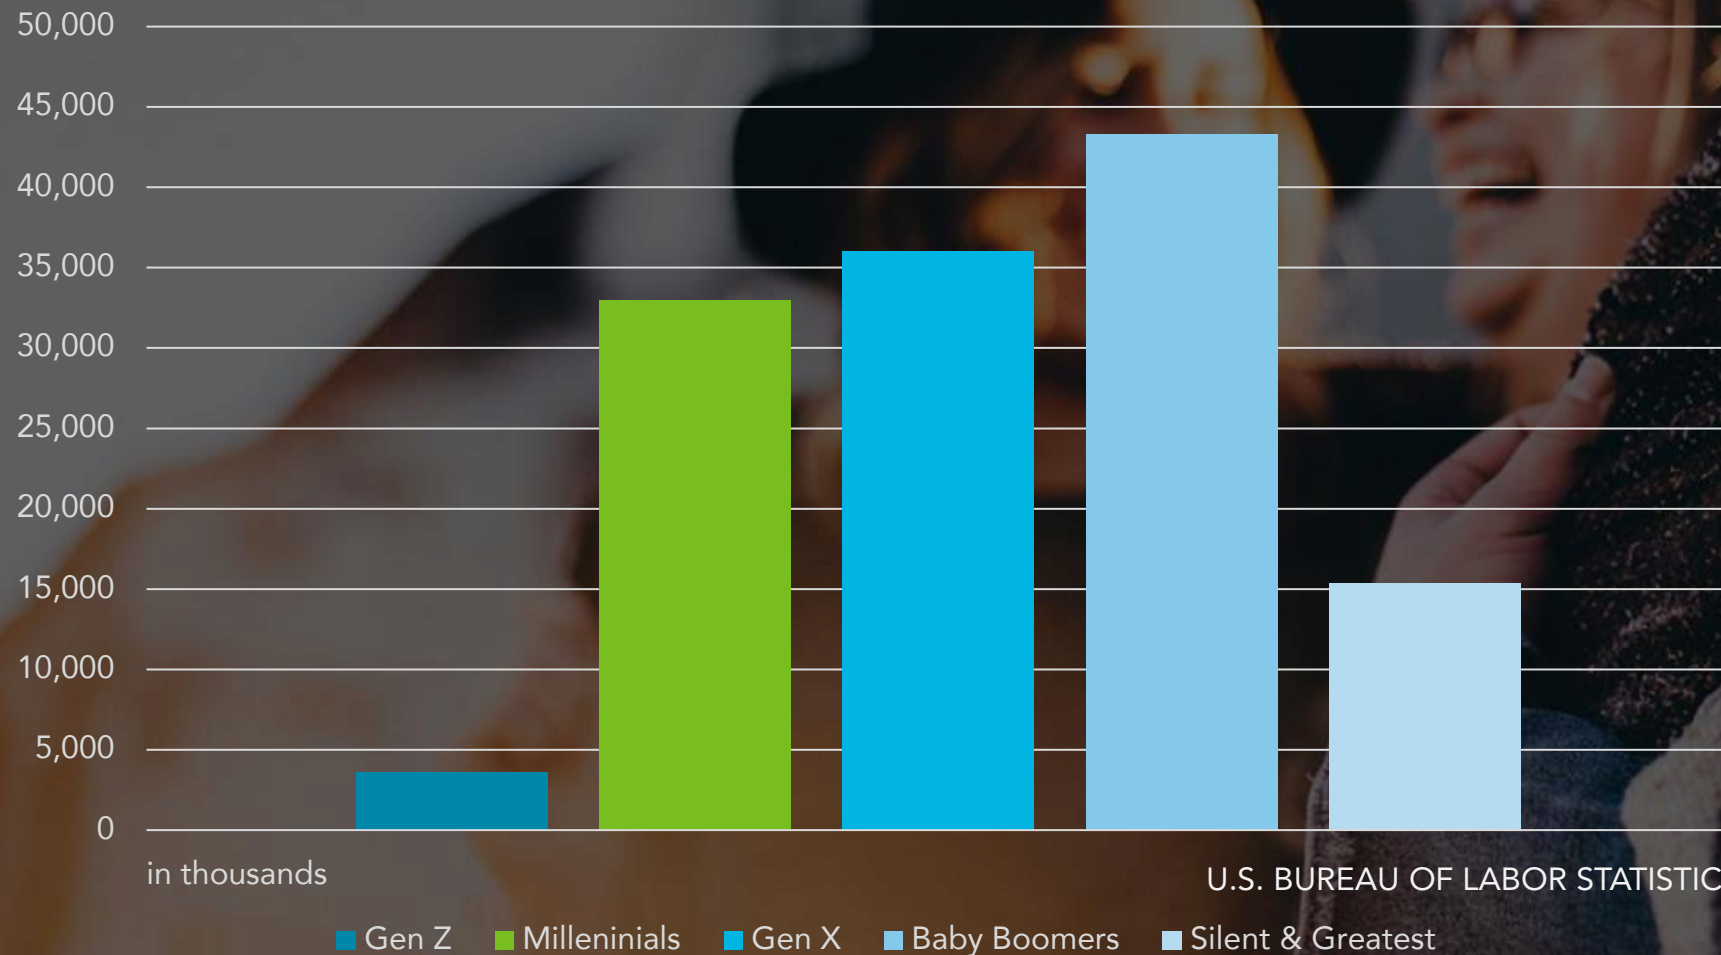

Nothing but Growth Ahead

RETAIL STRATEGIES

# Who we are

WHO WE ARE

# Our Partnership

The discovery is an ongoing process that will not stop.

Retail Strategies is very pleased to partner with for a common goal to generate new retail communication that would not otherwise happen. The **City of Burton** engaged **Retail Strategies** to market the community to key retail real estate industry contacts. Although we cannot guarantee success, we do guarantee you will be better off with us than without us

Burton will have multiple dedicated staff members working on behalf of the community in their areas of expertise. A *Portfolio Director* will serve as the primary Point of Contact (POC) to interact with Burton's primary POC. Additional team members include company executives, a retail development team, marketing, research, and legal teams. Confidential and non-confidential information will be communicated with the POC.

It is Retail Strategies' goal to spend our time doing the job you hired us to do and allow the local POC to navigate the local political landscape and communication flow. Local feedback and communication sharing from the primary point of contact working with Retail Strategies is a critical part of the engagement.

The initial 90 business days after engaging in our partnership have been spent on due diligence for the discovery phase. The following information is a highlight of key information collected that will be used as a starting point to begin the proactive marketing to a national network of retailers, brokers, developers, and key industry contacts on behalf of the community. Additional materials will be created throughout the course of the engagement.

Project-specific materials and reports will be created on a case-by-case basis as needed for effective information sharing, data analysis, and marketing efforts.

# Mobile Data Collection

This mobile tracking service uses data collected from mobile phone users who have agreed within their apps and phone settings to enable location information. By drawing a geofence around a specific business or location, we are able to gather valuable data about the customer base that has actively used their mobile device while in the identified location. This tool allows us to see where customers are coming from to shop in your market using actual data. This information is used to optimize your trade area, analyze business locations, compare the frequency of visitors, and assist retailers in site selection. This is intended to support the trade area but does not solely define the trade area.

The location tracked was  
Multiple retail nodes  
for the time period of  
May 2022  
To  
May 2023

# Customized Trade Area

Each retailer has a specific set of site selection criteria they use to determine if they will have a profitable store. Municipal boundaries, radius rings and drive times are a start to evaluating the information sought by these decision makers. A customized trade area is the next step to analyzing a market. A trade area defines a core customer base of consumers highly likely to shop and eat in the market at least once a month. Your trade area has been created by combining the mobile tracking data with drive times, geographic boundaries, and proximity to neighboring shopping destinations. Each retailer will analyze their own trade area based on their existing stores, their competition and site selection criteria.

Retail Strategies has created the customized core trade area shown in the map here which is focused on a consumer who might travel to the market to shop or dine.

# Lifestyle Reports

Lifestyle reports allow BIG DATA to be summed up into a simple narrative on the personality of most households.

When asked “Who is Burton?”, often the community leadership describes themselves rather than the dominant personality of the area. Understanding consumer spending behavior based on personality allows Retail Strategies to better align the retail prospects with the purchasing patterns of the consumers in your market.

ESRI Tapestry Segmentation is a geodemographic segmentation system that integrates consumer traits with residential characteristics to identify markets and classify US neighborhoods.

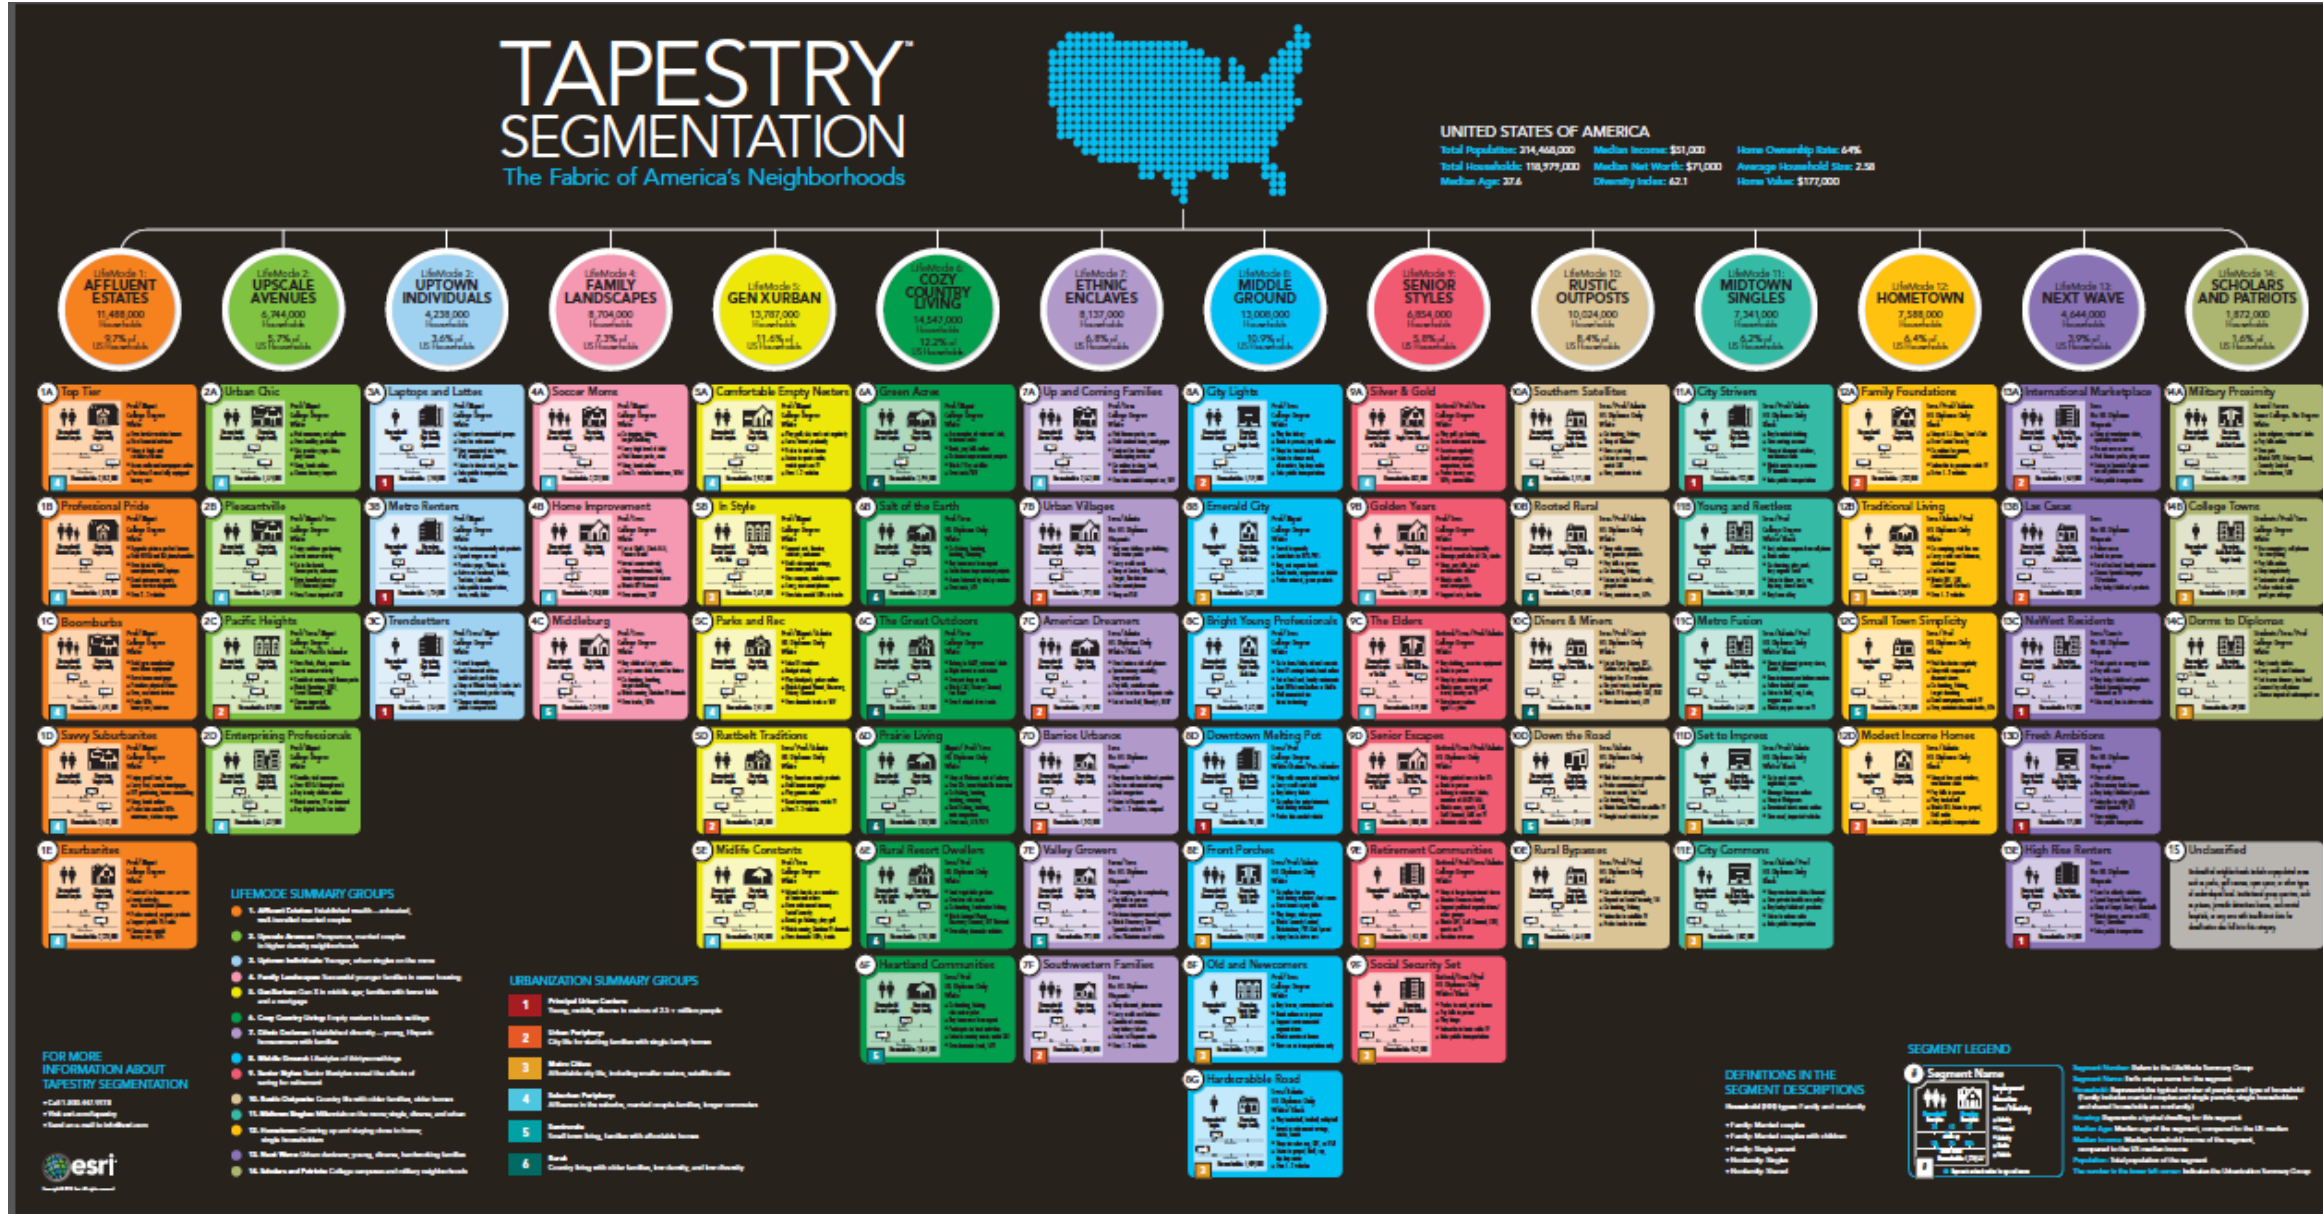

Neighborhoods with the most similar characteristics are grouped together, while neighborhoods with divergent characteristics are separated. Internally homogenous, externally heterogeneous market segments depict

consumers' lifestyles and life stages. Tapestry Segmentation combines the "who" of lifestyle demography with the "where" of local geography to create a classification model with 67 distinct, behavioral market segments.

Selection of the variables used to identify consumer markets begins with data that includes household characteristics such as single person or family, income, relationships (married or multigenerational), and tenure; personal traits such as age, sex, education, employment, and marital status; and housing characteristics like home value or rent, type of housing (single-family, apartment, townhouse, or mobile home), seasonal status, and owner costs relative to income. In essence, any characteristic that is likely to differentiate consumer spending and preferences is assessed for use in identifying consumer markets.

# GAP Analysis

The GAP Analysis helps us uncover the number of dollars being spent outside of the community on an annual basis from a categorical perspective.

The difference between demand and supply represents the opportunity gap or surplus available for each merchandise line in the specified reporting geography. When the demand is greater than (less than) the supply, there is an opportunity gap (leakage) for that merchandise line. For example, a positive value signifies an opportunity gap, while a negative value signifies a surplus.

Retail Strategies uses STI: PopStats as our provider of consumer demand and supply by establishment (or GAP) information. Several demographers provide the data in a variety of ways. Following are the sources and methodologies used by STI: PopStats and Retail Strategies to draw conclusions for you.

The market supply data is derived from annual retail sales and expenditures from the source data. The source for market supply is the U.S. Census Bureau's monthly and annual Census of Retail Trade (CRT) Reports; U.S. Census

Bureau's Economic Census. The source for the establishment is the Bureau of Labor Statistics (BLS). The consumer demand data by the establishment is derived from the BLS Consumer Expenditure Survey (CE).

Industries for the consumer expenditures survey are categorized and defined by the North American Industry Classification System (NAICS). Retail Strategies has narrowed down the categories to only those with real estate growth potential based on national trends.

Data is rarely perfect, but proper analysis, it can get us a lot closer to the answer than we would be without it. This is one of several tools used to identify focus categories for recruitment. Our focus in this area is more on the category than the actual dollar amounts.

DISCOVER

# Total Market Supply

## \$2,651,687,725

This represents the amount captured by businesses located in the defined trade area. By block group, the areas with darker green captured more dollars than the gray areas.

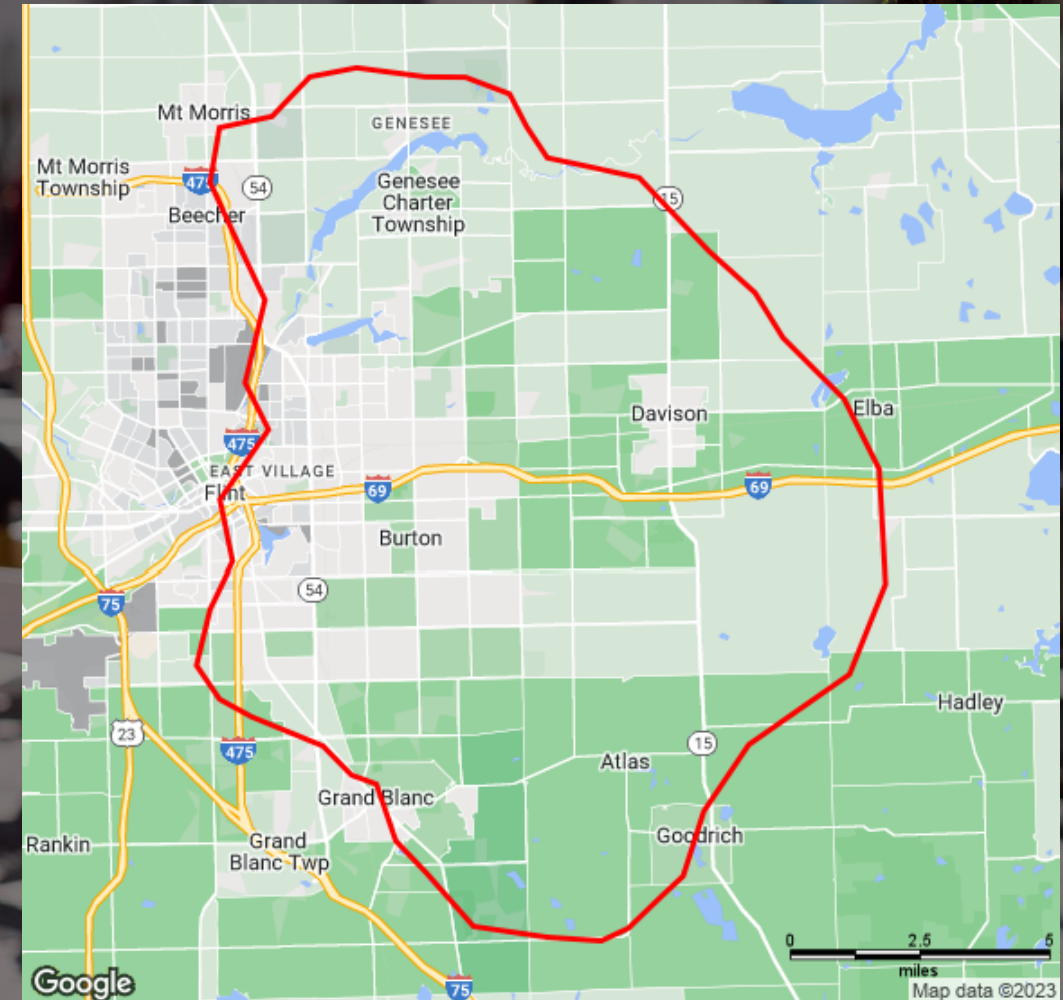

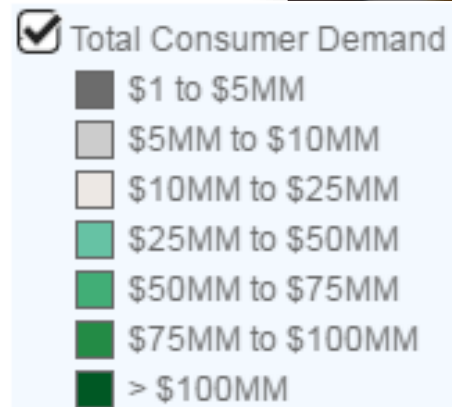

DISCOVER

# Total Market Demand

**\$2,252,497,298**

This represents the amount spent by consumers located in the defined trade area. By block group, the areas with darker green captured more dollars than the gray areas.

DISCOVER

# Opportunity Surplus

## \$399,190,428

This means more people purchase items inside of the defined Burton trade area than out of the Burton defined trade area for their consumer goods and services. Finding the specific categories where they are leaving the market is the key. Dark gray shows block groups of retail synergy capturing those dollars. This is where our focus will be to place new retailers and restaurants.

# Retail Webinars

Retail Webinars are an ongoing series of interviews with retail insiders focusing on a specific retail category, such as exercise and fitness or quick service restaurants.

Hosted by our President & COO, Lacy Beasley, these brief webinars pair well with our Focus Trends articles as a way to gain specific knowledge on the real estate choices and logic for expansion and closure that guides a single retail concept.

# The Process

After **discovering** and developing **connections** in the community and industry we proactively **advance** your community.

- We contact developers, retailers, tenant representatives, and franchisee groups - regionally and nationally.
- We make direct and indirect connections through conferences, in-person meetings, phone calls, and emails.
- We coordinate and communicate our efforts regularly with local brokers, property owners, and city staff
- We follow industry trends as well as changes in your local market to adjust our strategy and improve our efforts to maximize the retail potential in your community
